Sun-inspired rays

Soak up the energy of the sun with Sunburst, a high-tech, stand-alone sauna with an infrared heater from Sunlight Saunas. Unlike conventional saunas that use convection heat, Sunburst emits infrared light, the same energy released naturally by the sun. Infrared light has been associated with a variety of therapeutic benefits. The saunas are crafted of basswood and red Canadian cedar. Price ranges \$1,995-\$3,995, depending on the size. Visit the Sunlight Saunas showroom at 1661 N. O'Donnell Way, Orange. Call 714-282-0110 or log on to www.sunlightsaunas.com.
